picnic table
 "OSLO"

picnic table OSLO

weight = approx. 154 kg

Description

The picnic table consists of two A-shaped table legs made of 6 x 12 cm beams on which the tabletop and two seats are mounted. The seat consists of two 5 x 12 cm boards, individually reinforced underneath with a countersunk metal profile. The tabletop consists of five 5 x 12 cm boards individually reinforced underneath with a countersunk metal profile, as well. Furthermore, a metal cross profile is screwed underneath the middle of the tabletop, connecting the beams with each other. Between the table legs, an A-shaped 6 x 12 cm reinforcement beam is mounted.

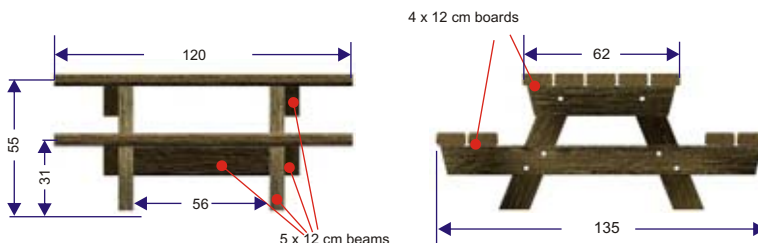

Anchorage

The picnic tables stand loose, the model with anchorage has lengthened legs (50 cm longer), which need to be dug in and anchored with concrete or stabilised sand. (see picture below) Cf. separate schedule on anchorage. The table can also be anchored by means of 4 galvanised angle-irons which have to be fixed underneath the table legs. These angle-irons are provided with a hole to fix a wire-bar M12 in to the ground.

picnic table OSLO Junior

weight = approx. 83 kg

Description

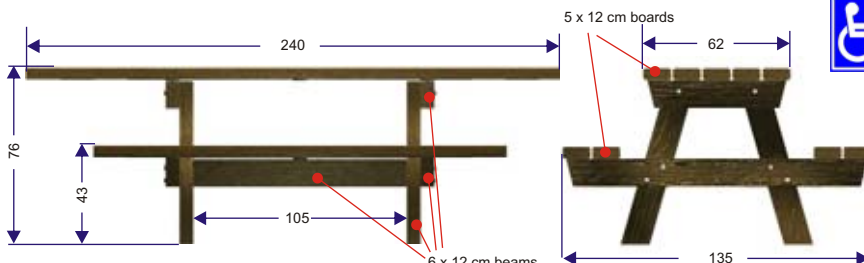

Description almost identical to OSLO. The beams and boards used are one size thinner and are not reinforced. As the drawing shows, the difference lies in the length of the tabletop and the sitting height.

Anchorage: identical to OSLO

picnic table OSLO XL

weight = approx. 180 kg

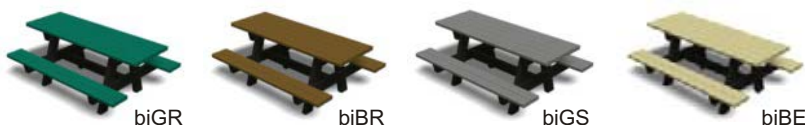

Description

Description identical to OSLO, but the length of the tabletop is 240 cm instead of 180. The tabletop has been lengthened on both sides to make the table accessible to wheelchair users.

Anchorage: identical to OSLO

bi-colour options :

If the table needs to be anchored, the legs are about 50 cm longer.

weight OSLO with anchorage = approx. 165kg
 weight OSLO Junior with anchorage = approx. 94kg
 weight OSLO Plus with anchorage = approx. 191kg

properties / material / look / maintenance

The boards are made of high quality recycled plastic, mass coloured : durable, weather-resistant, low maintenance, rotproof, recyclable. All metal fixing materials and parts are galvanised. The surface is knot free, evenly coloured and shows a faced, slightly shining structure.
